EXPERIENCE

SWE Intern

July 2026 – August 2026

Ambiguity Labs

Remote

- Created and evaluated **20+ engineering tasks** from real repository issues involving debugging, API failures, migrations, feature development, and infrastructure changes.
- Reproduced issues across existing codebases, including **TypeScript errors, C/C++ memory failures, workflow bugs, and configuration issues**.
- Dockerized** task environments with required code and dependencies for consistent task execution.
- Developed **reference solutions and automated oracle checks** to verify expected behavior and correctness.
- Evaluated **Claude and GPT-based coding agents**, analyzing task completion, correctness, and failure patterns.

Open Source Software Contributor

Jan 2026 – Apr 2026

AOSSIE – EduAid Project

Remote

- Strengthened LLM-based quiz generation by adding deterministic output, response validation, quality scoring, and support for long-document inputs.
- Improved backend efficiency by reducing unnecessary API response data and implementing compression, caching, batching, and lazy model loading.
- Used Celery and Redis for asynchronous AI inference, background task processing of AI-powered backend tasks.
- Resolved API and quiz issues through validation, security fixes, regeneration, review, and sharing.

PROJECTS

Personal Finance Manager Platform | [GitHub Link](#) [Website Link](#)

Skills: Next.js, TypeScript, PostgreSQL

- Designed data workflows for income, expenses, budgets, and transactions with persistent financial tracking.
- Developed savings-goal and bill-reminder workflows to track financial targets and upcoming payments.
- Provided **user-specific financial tracking** to help users monitor spending and manage financial goals.

PDF Chat Application | [GitHub Link](#) [Website Link](#)

Skills: LangChain, FAISS, PyPDF2, Streamlit

- Extracted PDF text, generated chunks, and created **embeddings** for semantic search.
- Indexed **20+ PDFs** in **FAISS**, achieving approximately **83% accuracy** on evaluated queries.
- Retrieved relevant document context using **LangChain** for natural-language question answering.

Smart Study Management Platform | [GitHub Link](#) [Website Link](#)

Skills: Next.js, TypeScript, PostgreSQL

- Generated **personalized study plans and timetables** to organize daily learning schedules and academic tasks.
- Centralized **tasks, resources, and progress tracking** into a single workflow for managing study activities.
- Provided **structured task tracking and progress visibility** to help users plan and maintain study routines.

EDUCATION

NIMS University

Jaipur, India

Bachelor of Technology in Computer Science Engineering, CGPA: 8.90/10

2023 – 2027

ACHIEVEMENTS

- Secured **AIR 83** among **20,000+ participants** in **CodeChef Starters 184 (2025)**
- Achieved **1750+ rating on CodeChef, 1750+ on LeetCode, and 1400+ on Codeforces**
- Solved **500+ DSA problems** across **CodeChef** and **LeetCode**, covering core data structures and algorithms

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL

Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Development: React.js, Next.js, Node.js, Express.js, REST APIs, PostgreSQL, Supabase

AI/ML & Tools: LLMs, LangChain, NLP, FAISS, PyTorch, Git, GitHub, CI/CD, Streamlit, Docker, AWS

CERTIFICATIONS

- OpenAI Academy X NxtWave Buildathon
- Deloitte Australia – Technology Simulation
- Walmart USA – Advanced SWE Job Simulation
- Responsive Web Design Certification
